

Product Overview: Periodicals Archive Online

An online archive of digitized, full-image journal articles, *Periodicals Archive Online* (formerly PCI Full Text™) offers unprecedented access to international, scholarly literature in the humanities and social sciences disciplines from 1802 to 2000.

Periodicals Archive Online

Periodicals Archive Online, with over 580 journals, 14 million pages and 2.8 million articles, offers institutions a virtual library and a permanent archive of retrospective journals for the humanities and social sciences. Some 20 percent of the journals are in non-English languages, indicating the broad international scope of *Periodicals Archive Online*. A new platform and new FAST search engine provide powerful and easy searching across the vast content.

Enhanced functionality includes free MARC records, Z39.50 support for federated searching, OpenURL compliancy, citation software support, and COUNTER-compliant usage statistics. A Quick Search is now featured on the Home page and on every page of the service for convenient searching for any level of user. Sophisticated post-search results filtering and sorting enhance the user's ability to quickly get to the right results. Links to JSTOR and Project Muse are also available. The My Archive feature allows every user to create a personal research area, with options to save searches, save records, and take notes between sessions.

Seven complete multidisciplinary, full-text journal collections are available, with an eighth collection now launched. Unique foreign language coverage is available in each collection. A collection of key Spanish-language titles is available separately, as well as themed collections covering literature, history, and philosophy & religion. Searchable full-text with hit term highlighting is featured in all collections making it straightforward to find your keyword search terms across large numbers of pages.

Periodicals Archive Online expands research opportunities and is available remotely at any time. It also serves as a permanent archive, with access to the full contents of every title, from cover to cover, thus allowing an institution to safely send fragile and space-consuming journal runs to storage facilities.

Using *Periodicals Archive Online* in conjunction with *Periodicals Index Online* allows users both to perform a comprehensive survey of the scholarship on a particular topic and to link seamlessly to a wealth of relevant full-text content.

Indexing for Periodicals Archive Online

Indexing for *Periodicals Archive Online* enables:

- Precise retrieval of information from eight combinable fields: Keyword, Article Title Keyword, Author, Journal Title, Language, Journal Subject, Year of Publication, and ISSN
- Proximity searching, truncation and Boolean searching both within and across fields
- Browsing of full-text journals by table of contents of each issue

Administration / Setup

Information on linking, MARC records, and title lists can be found in the Information Resources module or at <http://pao.chadwyck.com/info/index.do>.

You will find usage statistics and other administrative tools in the "Information for Librarians" section. An administrative password is required to access these tools.
